

## Technical Rider

- 12X24 stage with sturdy stairs for volunteers to go up and down.
- 20-25 sturdy armless chairs on stage (either one row or 2 if they don't fit in one row across).
- The lectern/podium should be removed from the stage for my performance.
- A handheld cordless microphone.
- I will need the ability to play my iPad from the stage going through the main PA system. I will also need power on stage for my remote control for my iPad.
- A small table (right beside or on the stage) to put my iPad on.
- 2 speaker monitors on stage to fill the stage with sound (my music and voice so the people getting hypnotized can hear clearly). It is very important that this is provided.
- A good dimmable whitewash for stage lighting.
